

Multi-Phase MSA Cuts Costs & Emissions

\$0 Upfront Customer Capital
Fortune 200 Aerospace Manufacturer
Operational 2019

Challenge

Implement a decarbonization program without increasing operating costs.

The manufacturer required:

- Emissions and energy savings across verifiable measures
- A phased and scalable rollout
- Capital preservation for core business growth
- Meeting corporate sustainability commitments

Solution

Master Service Agreement (MSA) funds a phased decarbonization program.

- Energy assessment uncovered 12 energy conservation measures
- Highest carbon-reduction projects were prioritized first
- Through project addendums, customer was able to add additional measures to the MSA

Technology

HVAC and Chiller Replacement

Retro-Commissioning & Controls

Compressed Air System Repair

Propane-to-Natural-Gas Conversion

Outcome

- \$0 upfront customer capital
- Each measure met or exceeded its forecasted savings
- Savings directly improved customer returns
- Sustainability commitments met without diverting capital
